

SKID-MOUNT CONCRETE MIXER

Two Sizes: 1.75 Cubic Yard or 1.25 Cubic Yard

Concrete Mixing Versatility

This Skid-Mount Mixer uses the same proven mixing technology as the Cart-Away Concrete Mixing Trailers. Simple and compact design has been a Cart-Away tradition since 1993.

These mixers are mounted on a steel frame that allows you to choose your mounting application. Set it on the ground, or on a platform, or move it around with a forklift, or mount it on a truck/trailer.

A simple control panel allows the drum to spin in two directions and tilt to dispense. Powered by Gas (standard), Diesel, or Electric driven hydraulics.

The Skid-Mount can be ordered with a TopLoader option that turns the mixer into an All-in-One Batch Plant.

The Skid-Mount options also include weigh-batching scales for those who need exact recipes.
